

Technical textiles for military applications

High-quality covering solutions for military applications across land, marine environments, and winter conditions.

Our fabrics are designed to withstand extreme temperatures, both high and low, and offer excellent UV resistance and durability under heavy wear. The fabric can be customized to provide antistatic properties and resistance to harsh liquids and chemicals, ensuring reliable performance in demanding operational environments.

With extensive experience in tailored manufacturing, we deliver solutions adapted to specific requirements. We also offer complete systems where supporting frameworks are needed.

ARMY RANGE

- protective covers
- roller doors
- sun protection
- enclosures
- gates
- hoods
- tents
- shelters
- roofing systems
- and more
